- **Version Control System** : Team Foundation Server & SVN, Git.
- **Web Technologies** : HTML, DHTML, CSS, XML, CSS3, HTML5, Bootstrap

EDUCATION QUALIFICATION:

- Master of computer application from Institute of Technology and Science affiliated to AKTU

EXAMINATION	BOARD /UNIVERSITY	SCHOOL /COLLEGE	YEAR
MCA	AKTU	Institute of Technology and Science	2013-2016
B.Sc.	Magadh University	A.M.College	2010-2013
Intermediate Examination	CBSE Board	K.V.No2 Gaya	2010
High School Examination	CBSE Board	K.V No 1 AFS Srinagar	2008

EXPERIENCE

Virtual Employee	Software Developer	Dec 2016 to Till Date
Bizbrolly Solutions	Software Engineer	March 2016 to Dec 2016

Responsibilities:-

Design, Analysis, Application trouble shooting, Technical Support onsite/offsite and development of Projects

Accomplishment:

Completed projects for various clients delivered on schedule.

Projects:Sports Perpetual

Nov 2018 - Present

Client : Iain Stamp

Team Size: 5

URL : <http://www.sportsperpetual.com/>

Sports perpetual is a fully automated betting software(bot) that place bets automatically on users behalf .there is no need of human interference to place bet .It consist of Web and console application where we have can have detailed report ie.profit and loss against the bet placed

Roles and Responsibilities:

- Requirement gathering and design of the application.
- Implemented Business Components and Data Layer Components using Microsoft Patterns in C#
- Participated in designing of solutions and identification of technologies to uses.
- Design of various service interfaces along with concurrency and security
- Analysis report for ratio of investment and the profit
- Integration of the third party tool for getting bet prediction
- Conversion of the actual data with respect to the data getting from the third party for placing bet .

Environment: Visual Studio 2017, Bootstrap UI, HTML5, Entity Framework, XML, SQL Server , TFS,Windows services

Projects: DSB Transport

April 2018 - Nov 2018

Client: DSB Transport

Team Size: 2

URL : <http://dsbtransportdispatch.com/>

DSB Transport provides excellent services for a variety of railroad crews.A Transport management system is automated transport provider in US to different RailRoad.

Roles and Responsibilities:

- Requirement gathering and design of the application.
- Implemented Base Classes and Components, Concurrency Management and Exception Management using C#.
- Participated in designing of solutions and identification of technologies to uses.
- Design of various service interfaces along with concurrency and security
- Design the base class to import data from Microsoft Project Plan and migrating system data to Microsoft Project Plan.
- Participation in database design.
- Form Based Authentication, Filters and Validations.
- Google Maps and Calendar implementation
- Complete system is converted from manual system to automated .Track cab payment ,analysis report for ratio of investment and the profit

Environment: Visual Studio 2015, Bootstrap UI, HTML5, Entity Framework, Asp.Net MVC, SQL Server , TFS

Gartan Roster

March 2017 - April 2018

Client: Gartan Technologies

Team Size: 15

URL : <http://gartan-greenbay-roster-ne.azurewebsites.net/>

Gartan Roster provides a macro view of scheduling, catering for multiple shift patterns and multiple locations. Fully compatible with existing HR, payroll and training systems, it offers a real-time view of staffing today and into the future.
